Marble finish options

Black, Onyx, Pearl, Grey Vein, Rosa Vein, Plain White

Stone finish options

Beige Stone, Cream Stone, Portland Stone

Our fire surrounds are manufactured from a mixture of 65% real stone or marble blended with resin. For use with electric fires and radiant type gas fires up to 3.8 kW output. 100 degree centigrade rating only. Not suitable for catalytic fire installations. Please consult your stockist if in doubt. Dimensions stated are for guidance only due to the tolerances (approx. 6mm) required for the casting process.

Please note that the dimensions are for guidance only due to the tolerances (approx. 6mm) required for the casting process. We can customise rebates from flush with the wall to 3" from the wall. We are committed to continuous developments and improvements of our products and colours. We reserve the right to withdraw products, materials and specifications without prior notice. All our fireplaces are produced to our own designs and are subject to registered or unregistered design right protection. Action will be taken on any infringement. Accuracy of colour is as close as the casting, photographic and printing process will allowing in the reduction of materials used. All copyright reserved.
